LIMSource

Lab Data Automation Products

This page provides an alphabetical list by company name to lab data automation products of interest to LIMS Professionals.

Automated Solutions Inc.

Automated Solutions provides a range of consulting services and an automated solution for instrument interfacing known as CHEMIST'S LabBENCH.

Contemporary Solutions Ltd

Contemporary Solutions offers a software package for linking analytical instruments to LIMS.

Earthsoft

Earthsoft provides a range of integrated software solutions and services for environmental applications. Their software solutions include software on LIMS called EQuIS, which offers electronic data delivery and QC database capabilities.

Enterprise Technology Automation, Inc

ETA, Inc provides an instrument data loader called LIMSLoader as well as computer consulting services specifically for scientists and engineers.

Galactic Industries Corporation

Galactic Industries Corporation designs, develops, and supplies data acquisition and processing software for the spectroscopy and chromatography fields

Gilson

Gilson offers a line of Combinatorial Chromatography Systems for HPLC purification and analysis of synthetic library products.

Herstal Automation Ltd

Herstal Automation offers a full line of hardware and software solutions to unattended backup, archival and hierarchical data storage problems.

Labtronics Inc

Labtronics' Windows-based software, LimsLink, automates data collection from up to nine instruments simultaneously.

LC Resources

LC Resources provides a range of HPLC training, laboratory services and software solutions in separation technology.

Planet Computing, Inc.

Planet's LinkPAD hand-held computer enables hand-held access to the LIMS.

Scientific Software

Scientific Software is a software engineering company that markets products for data acquisition and instrument control of laboratory equipment.

Software Interfaces

Software Interfaces provides SQLASSIST, a tool for enterprise-wide data access that allows data to be integrated.

SPSS Inc.

SPSS offers training, consulting, and software products for business and general applications. Of interest to the laboratory are their

PM3000468825

software solutions, including statistical and quality packages.

● Summit Research Services

Summit Research Services offers data acquisition, analysis and reporting software for the analytical laboratory environment, particularly the pharmaceutical industry.

Tal Technologies Inc

Tal Technologies offers a product for simplifying serial data acquisition from instruments.

Thru-Put Systems Inc

Thru-Put offers a line of specialty software products designed for analytical applications on the HP-UX 700 series workstations and on the Windows NT operating system.

Transition Labs

Transition Labs offers PreLIMS software for management of routine sample schedules, instrument maintenance, methods, personnel and time.

Waters Corporation, Chromatography Division

Waters maintains a technology and product base in all the critical components of high performance liquid chromatography (HPLC), including LIMS interface capabilities for their Millennium line of client/server chromatography information management systems.

WindowChem Software

WindowChem is a central source for ordering a wide variety of laboratory software programs for applications in the areas of biochemistry, chemical databases, chromatography and more.
